The Splendid Showing In the Chloride Point.

BIG VALUES ENCOUNTERED

MANY FACES OF HIGH-GRADE MINERAL EXPOSED.

The Mercur's Third Vein-Continuity of This Deposit Demonstrated-Temporary Injunction Granted-Four Aces and Northern Light-Could Not Break Chloride Point,

The Northern Light, on Lien hill, is not the only mine in that locality which can boast of the possessions of splendid bodies of high-grade ore expesed in its workings, for, as the saying is, "there are others." and the Chloride Point is one of these; and the very favorable reports received from this mine of late were, without doubt, the cause of the sudden advance in the stock of the company on the floor of the exchange yesterday.

As a matter of fact, it is understood that the mine is looking better than ever before in liss history, as magnificent bodies of mineral have been uncovered in the different portions of the property of late, and so extensive are these deposits that the success of the enterprise is assured.

According to a well-known mining man who visited the Chloride Botton. in its workings, for, as the saying is,

enterprise is assured.

According to a well-known mining man, who visited the Chloride Point a few days ago, the revelations there are most surprising as well as gratifying, as it is reported that on the third level in the mine a body of ore about eighteen feet in width has been exposed, three feet or more of which will carry sverage values of 32; ounces silver and \$4 in gold to the ton, while the balance of the vein will go forty-two ounces silver and from \$1 to \$2 in gold; while in another place in this prospective bo-A in gold to the ton, while the balance of the vein will go forty-two ounces silver and from \$1 to \$2 in gold: while in another place in this prespective bomanza, on the second level, a face of mineral is exposed running forty-six cances in silver on an average and a dollar or so in gold, the metal being in the shape of chlorides, while the ore is an excellent leaching product by the cyanide process. Besides this, there are workings on both of these levels, where good breats of ore are showing, which carry values of thirteen, twenty-four, thirty-four, six and eight ounces in the white metal, as well as some gold, and men are at work at all of these points, breaking down pay rock galore, every fact of advance made showing that the officers of the company are hardly able as yet to company are hardly able as yet to comprehead the magnitude and value of the magnificent bodies of ore embraced within the boundary lines of the Chloride Point group, the indications pointing to the fact that adjoining properties are equally as rich in their metal-lic wealth, development only being necessary to disclose their hidden resources in this line.

The mill at the present time is working only about hair capacity, but the output will be increased when the ore chute from the mouth of the tunnel to the mill is completed.

It is understood that in the treatment of ore at the mill a recovery of all the gold values is recorded, while of the silver a saving of from 70 to 75 percent is made. No sorting is being done at the reduction works, and the rich rock above mentioned is run into the tanks along with the mineral of lower grade, all of which, however, is high enough to treat at a handsome profit.

THE MERCUR'S THIRD VEIN.

Continuity of This Deposit of Mineral Now Fully Demonstrated.

onsiderable excitement was created months ago over the discovery of a third vein or mineral zone, carrying pay gold values, in the Mercur mine, in Camp Floyd district, two shafts being sink into this strata of ore, on from the Ruby and the other from th Resolute thanel, the deposit being from the second vein, from which larg amounts of ore have been blocked out during the past vece or the second vein.

amounts of ore have been blocked out during the past year or two.

After proving the existence of the third vein by the sinking of these shafts, it was decided to demonstrate if possible, the continuity and perma-nency of the deposit, and with this in view, a new incline was started from the surface at a point between the Mer-cur and Resolute tunnels.

This was two or three months ago and but little has been heard of since regarding the enterprise, and possile regarding the enterprise, and possile

This was two or three months ago, and but little has been heard of since regarding the enterprise, and people had almost forgotten about it, and the fact would have soon faded from their minds had it not been that yesterday Superintendent Edwards telephoned to the company's office in this city that at a depth of 200 feet the new incline had broken into the ore zone, and that for five days he had been drifting on the vein in a fine body of pay ore, the present workings being at a point about 500 or 600 feet from the nearest shaft, which has penetrated the third ore belt; and as the pitch of the vein is cowards the shafts from the Ruby and Resolute workings, previously mentioned, and the dip of the vein is regular and rather that, and it is fair to presume that the third vein is manimoth in its proportions, as well as highgraide in its gold contents, the discoving manifecent dividend-paying mine.

The Herald is informed that it is the futention of the company to go still deeper in the development of the still deeper in the development of the company to go still deeper in the development of the still deeper in the development of the company to go still deeper in the development of the company to go still deeper in the development of the company to go still deeper in the development of the company to go still deeper in the development of the company to go still deeper in the development of the company to go still deeper in the development of the company to go still deeper in the development of the company to go still deeper in the development of the company to go still deeper in the development of the company to go still deeper in the deeper the development of the company to go still deeper in the deeper to the development of the company to go still deeper in the development of the company to go still deeper in the deeper the development of the company to go still deeper in the development of the company to go still deeper in the development of the company to go still deeper in the development of the company to go

The Herald is informed that it is the futentian of the company to go still deeper in the development of the mine, with the expectation that at regular distances additional zones of pay rock will be found until a depth is attained at which the ore cannot be worked at a regular which would be at 3000 or 4000 at 4000. profit, which would be at 5,000 or 4,009 feet.

Surely the Mercur is a great mine, and is good for "velvet" for many years to come.

NORTHERN LIGHT WAY UP. The Attempt to Break Chloride Point

Resulted In a Failure. Yesterday's call on change was marked by many interesting features, the session occupying a period of two No. 53 West Second South. 'Phone 339. and a quarter hours, every minute of which was fully occupied in the trans-

which was fully occupied in the transcation of business.

The chief features of the call were
the dealings in Four Aces, Northern
Light, Chlorids Point and Daiton.

Four Aces started out in good form,
and was a steady climber until the
close, the transactions in this security
being quite heavy, with an upward tendency to the market. Northern Light,
at the start, was a dealer at 60 cents,
but later on it was beared until it
touched 64 cents in the way of sales,
when a reaction took place, and steady
gains were noticeable, the closing
transfers being posted at 67 cents. An
effort was made to break Chloride
Point, the attempt being unsuccessful,
although sales were recorded at the
opening at \$1.05, \$1.19 and \$1.125, but
before the close it was an active dealer
at \$1.274. Dalton changed honds at 4
cents when first called, and exciting
times were witnessed dweing the call
of this stock sales being the order of

able to register gains, and was a dealer at figures as high as 7 cents, Golden Eagle changing hands at \$3 cents, and Homestake at \$ and \$\frac{1}{2}\$, Joe Bowers Extension suffered slight losses during the calt. Little Pittsburg, Sunbeam and Shewers Consolidated were traded in at about usual quotations, a board jot of Star Consolidated finding a buyer at \$1.79. Success was a dealer, and so was Valico, the latter being picked up at \$1.17.

the consent of all three partners. The complaint still further alleges that while the petitioner was absent an alleged transfer of the shares was made, by which Whalen claims to have the authority to vote them as his individual property, which he asserts they are. The court's decision orders the trustees to retain possession of the shares until the matter is fully investigated, and a settlement can be made.

The value of the stock involved is estimated at nearly \$2,000,000.

The Diamond Consolidated Mining com-pany held its annual meeting yesterday. Dan Clays of Bingham was in yesterday with two carloads of high-grade ore from the Julia Dean.

highest terms of the outlook for this industry.

Colonel H. G. Heffren is making a
great showing in the South Daisy mine on
the West Dip and it is stated that a mill
will adorn this property in the speing. On
the 25e level the one body was found to be
twenty-seven feet. In width by crosscutting, the mineral carrying good milling
values. Since this work was done the
shaft bas been deepened fifty feet and
the vein drifted on for 100 feet one way
and fifty feet in the other, the workings
being in a mammoth body of fine milling
gold ore and it is stated that the showing
in the South Daisy is as good as in any
other property in that locality.

being the intermion to go below the pyritic iron capping to the large zones of rich ore which are believed to exist below.

There has been such urgent demand for Silver Park since the incorporation of the company that the 20,000 shares set aside for treasury purposes has failed to souply the demand and friends of the incorporators of the company are camoring for shares in the association to such an extent that it may be necessary to let out a little more of this security to appease them.

The property of the Lion Consolidated Mining company incorporated yesterday on Stockton ground, embraces the old Lion mine which, in the last has made an enviable reputation as a prolific wealth producer. It is the intention of the company to open up this bonana in a thorough manner and it is believed that it will not be long before it will find a pluce on the list as a regular shipper and also a paying proposition.

The directors of the Buiklin company, owning the Vanderbilt group on the West Dip of Camp Floyd district, held a meeting This week and decided to pace a block of the freasury stock of the association on the market, it being proposed to begin at once the continued development of this promisers sround which adjoins the Daisy and Oraha, and in which fair gold values have been encountered in former workings.

Quite a number of promisers from the company's ground has been prepared by I. T. Breekon, M. E., who speaks in the highest terms of the outlook for this industry.

Wheat Had a Weak Opening, But

Brave Men Fall
Victims to stomach, liver and kidney troubles, as well as women, and all feel the results in loss of appetite, poisons in the blood, backache, nervousness, headache and tired, listless, run-down feeling. But there's no beed to feel like that. Listen to J. W. Gardner, Idaville, Ind. He says: "Electric Bitters are just the thing for a man when he is all run down and don't care whether he lives or dies. It did more to give me new strength and good more to give me new strength and good appetite than anything I could take. I can now eat anything and have a new lease on life." Only 56 cents. at Z. C. M. I. drug department. Every bottle guaranteed.

AZTEC TEMPLE DISCOVERED.

Ancient Ruins Uncovered at El Paso, Texas.

El Paso, Tex. Jun. II.—An Astec temple long buried beneath the surface of the earth has been uncovereds within the limits of this city, according to Dr. Leon Berson, a graduate of Oxford university and an archaeologist of note, who is connected with the Pregatro university at the City of Mexico. At his own solicitation, he was sent by the Mexican government to search for the remains of an Aziec temple and vinaga which he isarned from ancient records in the archives of Mexico were situated somewhere near here on the left hank of the Rio Grande.

Recently the scientists unsarthed several stones covered with hieraglyphics within the corporate limits of the town and at a depth of ten feet a wall of solid mascarry was uncovered.

The scientist is confident he has discovered the Astec temple and expects to unearth many relics of great value. Dr. Berson has discovered many valuable relics in Mexico, acrong them the famous god. Paxel, now in the City of Mexico, and a number of tablets of stone covered with hieroglyphics, which, when desciphered proven to be of great benefit historically. El Paso, Tex., Jan. 11,-An Asteo tem-

Working Night and Day.

The busiest and mightlest little thing that ever was made is Dr. King's New Life Pilis. Every pili is a sugar-coated globule of health, that changes weakness into strength, listlessness into energy, brain-fag into mental power. Itchy Scaly Eczema Seven Years. Face and Head Full of Large White Scales and Sores.

So Disgusted I Was Ashamed To Be Seen in Company. Instant Relief and

SPEEDY CURE BY CUTICURA.

My case of Eczema was of about seven years' standing. It was of the scaly, itchy kind. I sometimes thought my face and arms were afte. My face was full of large, white scales, and my head was full of large, white scales, and my head was full of sores, in fact I was disgusted, I was ashamed to go in company. I took five bottles of CUTIQUEA RESOLVEST, washed my face and arms with CUTIQUEA SOAP, put on CUTIQUEA (ointment, and found great relief instantly, and I got a clean face again, thanks to the CUTIQUEA REMEDIES.

YOU may do as you see fit with this.

SAME TROUBLE WITH THE OVERCOATS.

ONE PRICE. J. P. GARDNER,

136, 138 MAIN STREET.

A well-known gardener of Pemberton, N. J., contracted chronic diarrhoea in the U. S. service during the Civil War, and has suffered from it and from consequent diseases of the stomach and liver ever since. "I went to see several doctors" he writes, "but they did me no good. I have taken all kinds of medicine I have seen advertised, but obtained no relief. I went to Camden one day and saw a store window full of Ripans Tabules. I had seen the medicine advertised so often that I thought I would buy a package. I took them and felt better; they did me so much good that I will keep on taking them. My stomach is all right and I can eat a good meal. They are the best medicine I ever took."
